

1. File Naming (Strict Format)

I have correctly named all required files:

- ☐ GroupName_HMI_FinalPrototypeScreen.pdf
- ☐ GroupName_HMI_FinalReport.pdf
- ☐ GroupName_HMI_Evaluation.xlsx

If using MIT App Inventor:

- ☐ GroupName_HMI_Chatbot.apk
- ☐ GroupName_HMI_Chatbot.aia

⚠ Wrong file name = mark deduction.

2. Version Control (Figma / Canva / Other UX Platforms)

- ☐ I duplicated my FINAL project file
- ☐ I renamed it: **FINAL – DATE – TIME**
- ☐ I saved the correct version in Version History
- ☐ I set sharing permission to **View-Only**
- ☐ I tested the link using another account / incognito mode

⚠ If lecturer can edit your file = penalty.

3. Link Placement

- ☐ View-Only link is inserted inside FinalPrototypeScreen.pdf
- ☐ View-Only link is also inserted in Evaluation Form
- ☐ Link is accessible (not private / not restricted)

(MIT App Inventor projects excluded)

4. FinalPrototypeScreen.pdf Content

- ☐ Screenshot of “FINAL – DATE – TIME” label included
- ☐ Screenshot of Version History (with timestamp) included
- ☐ Entire user flow clearly shown
- ☐ All interface screens exported as PDF
- ☐ Screens are readable (not blurry / cropped)

☐ Format followed (1 screen = 1 page OR 2 screens = 1 page)

For MIT App Inventor:

- ☐ Project name visible
 - ☐ Date created & modified visible
-

5. Group & Evaluation Requirements

- ☐ All group member names included
 - ☐ Peer evaluation summary completed
 - ☐ Required signatures included
 - ☐ All members clicked “Submit” individually
-

6. Final Declaration

By submitting, I understand that:

- ☐ This is my FINAL version
 - ☐ No updates or changes are allowed after deadline
 - ☐ Only submitted files and View-Only link will be graded
 - ☐ Late changes will NOT be considered
-

FINAL SELF-CHECK

Before clicking submit:

- ☐ I downloaded and re-opened my PDF to double-check
- ☐ I clicked every link inside my PDF
- ☐ I confirmed all files are uploaded correctly
