1.1 Shopping Cart Interface (Member 3 : Wong Yew Jonn)

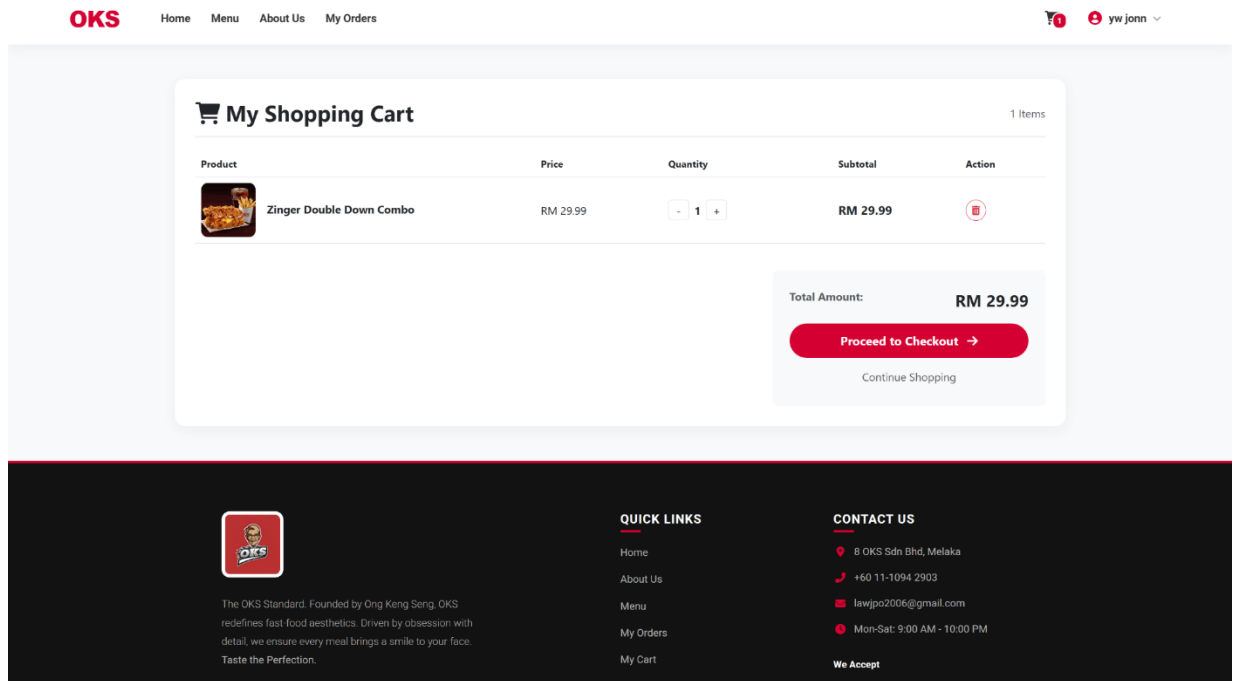

Figure 1 shopping cart page

This screenshot shows the Shopping Cart page where users can review the items they have selected before proceeding to checkout. The cart displays detailed information including product image, product name, price, quantity controls, and subtotal for each item. Users are able to adjust item quantities, remove items from the cart, continue shopping, or proceed to checkout, providing flexibility and control over their order.

1.2 Checkout interface (Member 3 : Wong Yew Jonn)

The screenshot displays the 'Checkout' page of the OKS website. The top navigation bar includes the 'OKS' logo, links for 'Home', 'Menu', 'About Us', and 'My Orders', and a user profile section for 'yw jonn'. The main content area is titled 'Checkout' and is divided into two sections: 'Delivery Details' and 'Payment Method'. The 'Delivery Details' section contains fields for 'Name' (yw jonn), 'Phone Number' (+601234567890), 'Delivery Address' (with an option to 'Use my registered address' and a default address 'no99 jalan ayam, melaka'), and 'Detailed Address' (with an example 'e.g. No. 88, Jalan Pauh 1, Taman Pang'). Below these are dropdown menus for 'State' and 'City'. The 'Payment Method' section offers 'Cash On Delivery (COD)' and 'QR Pay' options. At the bottom, a summary box shows 'Total Amount to Pay: RM 29.99' and a red 'Place Order Now' button.

Figure 2 Checkout page

This screenshot illustrates the Checkout page where users finalize their food delivery order. Users are required to review and confirm their delivery details, including name, phone number, and delivery address, to ensure accurate delivery. The page also allows users to select a payment method and view the total amount before placing the order, ensuring transparency and reducing order errors.

1.3 My Orders Interface (Member 3 : Wong Yew Jonn)

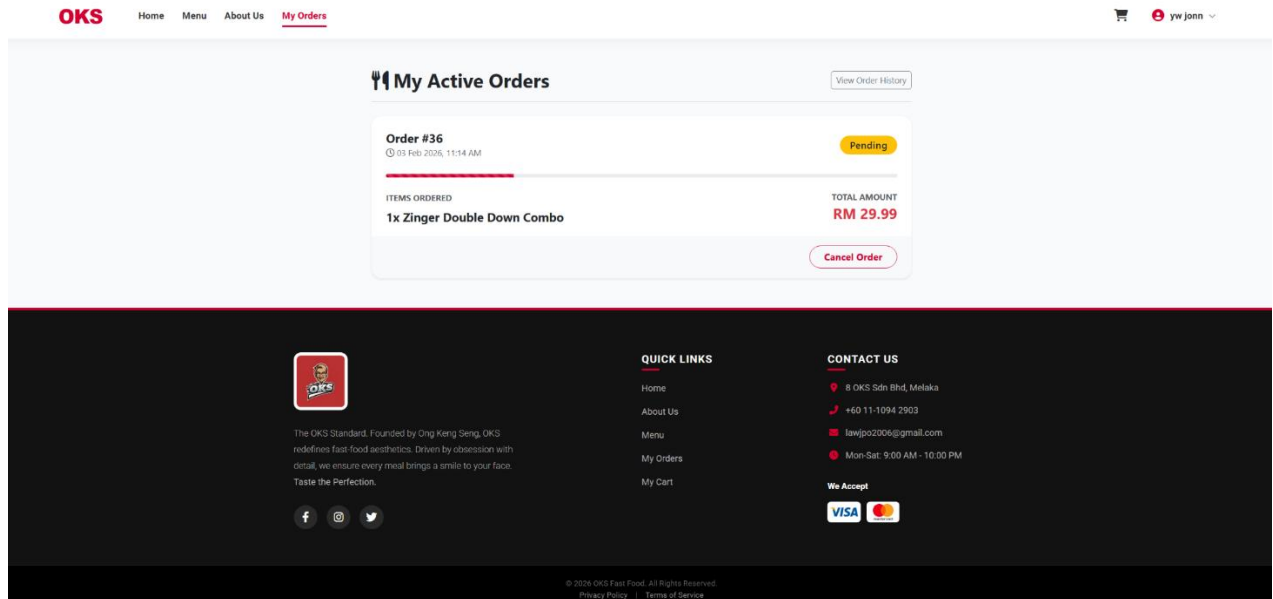

Figure 3 My order page

This screenshot displays the My Orders page, which allows users to track their active and previous orders. Users can view order details such as order number, order date and time, ordered items, order status, and total amount. The interface also provides an option to cancel an order when the status is still pending, enhancing user control and satisfaction.

1.4 About us Interface (Member 3 : Wong Yew Jonn)

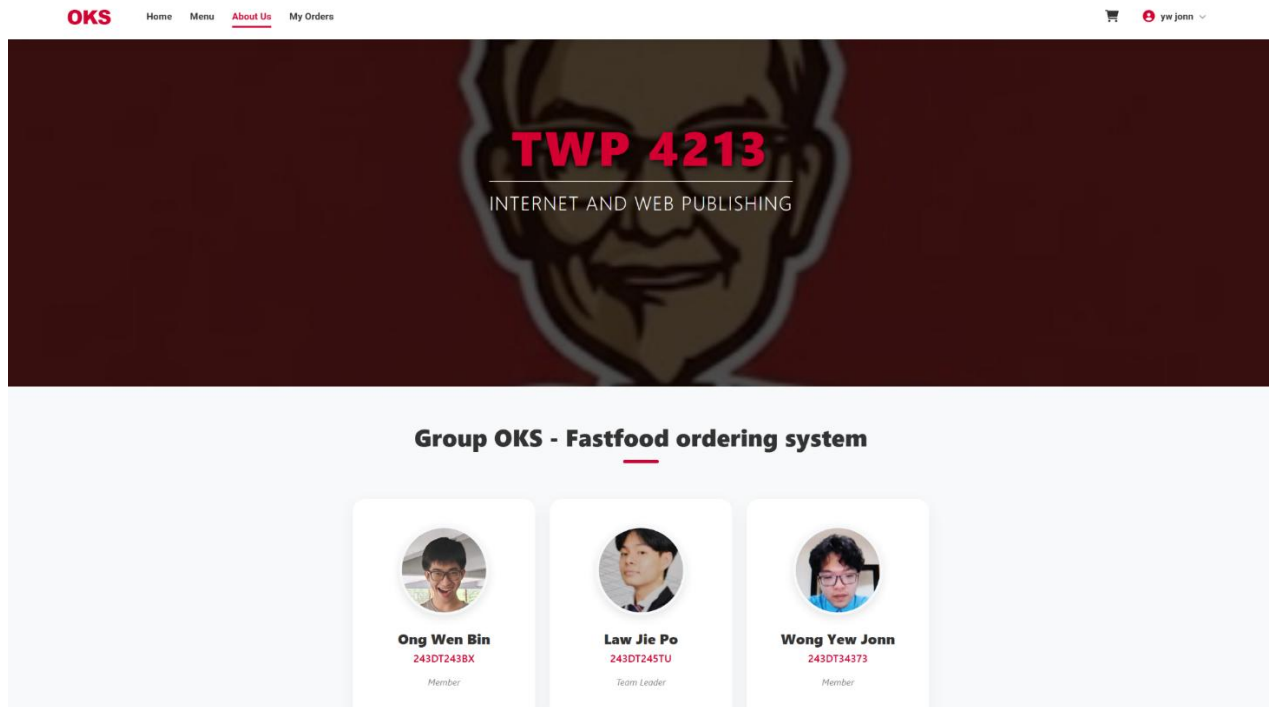

Figure 4 About Us Page

This screenshot shows the About Us page, which provides users with background information about the KS ONG Fast Food Ordering System and the project team. The page introduces the purpose of the system, the course details, and the team members involved in the project. This section helps build credibility and allows users to better understand the people behind the system.

2.1 Manage category page (Member 3 : Wong Yew Jonn)

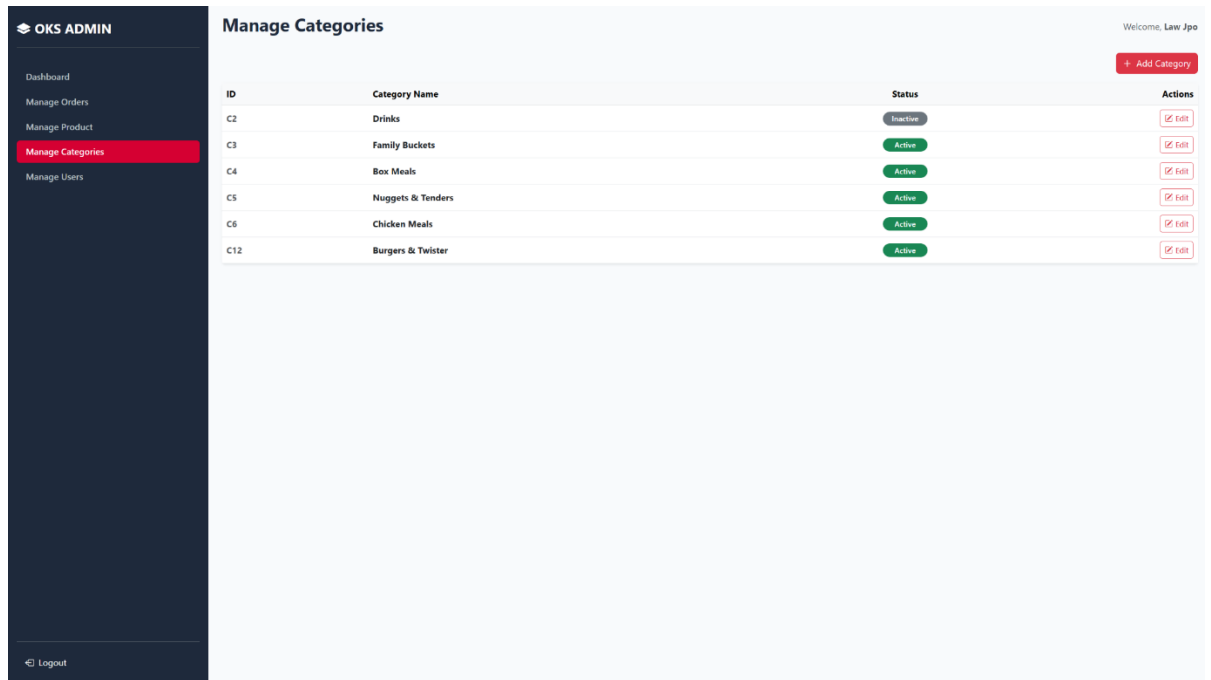

Figure 5 Admin Manage category page

The Manage Categories page enables administrators to **organize products into predefined categories** such as Family Buckets, Box Meals, and Drinks. Category status can be set to active or inactive, controlling whether products appear on the customer menu. This improves menu structure and simplifies product filtering for users.

2.2 Manage user page (Member 3 : Wong Yew Jonn)

ID	Username	Email	Mobile	Address	Role	Status	Actions
#5	Law Jie Po	Lawjpo2006@gmail.com	+60127066657	-	Admin	Active	Edit

Figure 6 Admin Manage user page

This page allows administrators to **manage system users**, including customers and other administrators. Information such as username, email, mobile number, address, role, and account status is displayed for monitoring purposes. Administrators can edit user details and assign roles to maintain proper system access control.

3.1 Test Plan

The system testing process for the **KS ONG Fast Food Ordering System** focuses on validating both customer and admin functionalities to ensure accurate system behaviour, secure access, and smooth user interaction. Testing covers user registration, login authentication, menu browsing, shopping cart operations, checkout flow, order tracking, and admin management functions including order handling, product management, category control, and user administration.

Both valid and invalid inputs are tested to verify correct system responses, error handling, and overall system reliability

3.2 Test Case

3.2.1 Customer Module Test Cases

Test ID	Test Case	Expected Result	Actual Result	Status
C14 (Member 3)	View shopping cart	Cart displays selected items correctly	As expected	Pass
C15 (Member 3)	Update item quantity in cart	Subtotal and total update automatically	As expected	Pass
C16 (Member 3)	Remove item from cart	Selected item is removed successfully	As expected	Pass
C17 (Member 3)	Checkout with empty cart	System displays “Cart is empty” message	As expected	Pass
C18 (Member 3)	Checkout with valid details	Checkout page shows correct order summary	As expected	Pass
C19 (Member 3)	Place order using Cash on Delivery	Order is placed successfully	As expected	Pass
C20 (Member 3)	Cancel active order	Order status changes to “Cancelled”	As expected	Pass
C21 (Member 3)	View order history	Completed orders are displayed correctly	As expected	Pass

3.2.2Admin Module Test Cases

Test ID	Test Case	Expected Result	Actual Result	Status
A14 (M3)	View list of registered users	User list is displayed correctly	As expected	Pass
A15 (M3)	View user account details	Selected user information is shown	As expected	Pass
A16 (M3)	Update user role or status	User role/status updates successfully	As expected	Pass
A17 (M3)	Activate or deactivate user account	Account status changes correctly	As expected	Pass
A18 (M3)	View product categories	Category list is displayed correctly	As expected	Pass
A19 (M3)	Add new product category	New category is added successfully	As expected	Pass
A20 (M3)	Edit existing product category	Category details update correctly	As expected	Pass
A21 (M3)	Activate or deactivate category	Category status updates correctly	As expected	Pass
