

ASSIGNMENT EVALUATION

Group Name	:	
Date	:	
Lecturer Name	:	

Student 1	:		Set VM	
Student 2	:		Set VM	
Student 3	:		Set VM	
Student 4	:		Set VM	

Part 1: Report (180 marks)					
No.	REPORT EVALUATION CRITERIA	S1	S2	S3	S4
1.	Report Format (10m) Follow the correct and consistent line spacing, alignment, header, and footer. Content is organized in a structured manner. Diagrams and figures and labelled with brief descriptions.				
2.	Table of contents (10m) Functional and serves as navigation for the document. Include list of tables and figures.				
3.	Introduction (10m) Clear explanation of virtualization concepts and the importance of VM performance analysis.				
4.	VM Setup Details (50m) Comprehensive comparison table of VM configurations, including CPU, RAM, storage, and OS.				
5.	Methodology (30m) Detailed explanation of testing procedures, tools used, and installed applications for comparison.				
6.	Performance Analysis (Results & Graphs) - (50m) Accurate and well-presented data comparing CPU, memory, disk performance, boot time, and application performance across VMs. Includes relevant graphs and tables.				
7.	Originality (20m) Report has low similarity index and AI detection				
8.	Conclusion (20m) Explanation of what has been learned in both sets of papers.				
	TOTAL (180 marks)
